

Run your entire school from one place.

Marks, report cards, transcripts, GCE-style mock results, fees, payroll, attendance and parent messaging — every role working from a single, bilingual system that lives on your own server.

The screenshot displays the 'Admin Dashboard' interface. At the top, it shows the user's role as 'LISE Portal Administrator' and the date 'Monday, 15 June 2026'. A navigation sidebar on the left includes options like Overview, Academics, Assessment, Students, ID Cards, Reports, Transcript, and System. The main dashboard area features four summary cards: STUDENTS (2616), TEACHERS (23), CLASSES (60), and ENROLLMENTS (2616). Below these is a 'Recently Added Students' table with columns for MATRICULE, FIRST NAME, and LAST NAME. The table lists several student records with their matricule numbers.

MATRICULE	FIRST NAME	LAST NAME
13216546		
202676361		
202646545		
202659846		
202688339		
202658830		
202668148		

IF YOUR SCHOOL ALREADY RUNS ON SOMETHING

You've probably already solved this — the hard way.

Most schools have *something*: a spreadsheet one person maintains, a generic system imported from abroad, a locally-built tool that breaks when its author leaves, or a cloud service billed every month. They tend to share the same four complaints.

**Nothing talks to each other**

Marks in one place, fees in another, attendance in a book, payroll in a spreadsheet. Every cross-report is assembled by hand.

**It wasn't built for us**

The grading is wrong, the report-card format is wrong, the terminology is wrong — and sequences don't exist in it.

**We depend on one person**

The one who built the Excel or maintains the local tool. When they travel or leave, the school is stuck.

**We pay forever, own nothing**

Cloud systems charge every month, and the data isn't yours. Stop paying, and you lose access to your own records.

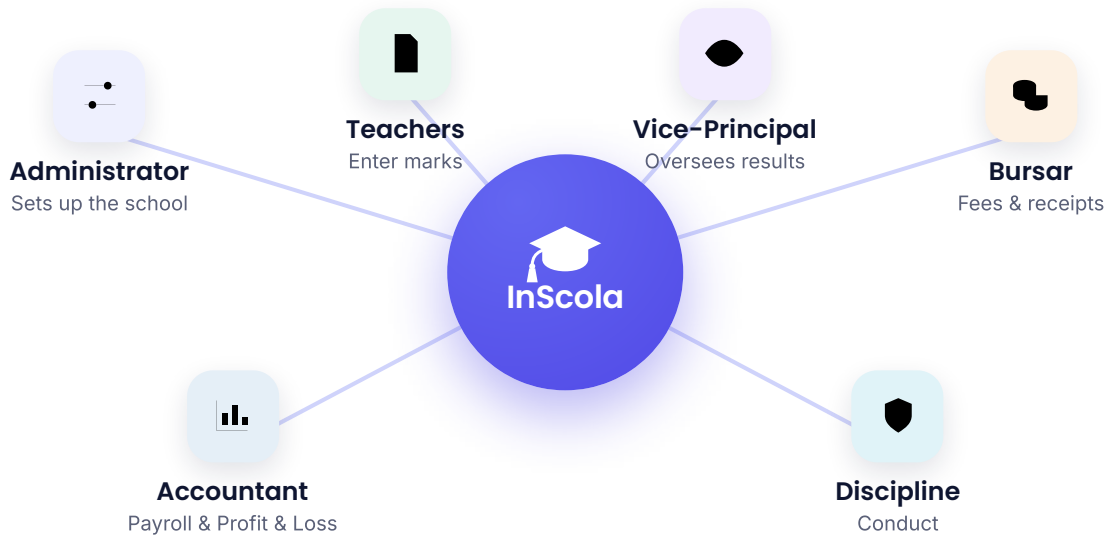

THE REAL QUESTION

It isn't whether you have a system. It's whether yours does *everything*, fits *your* school, and actually *belongs to you*.

WHAT INSCOLA IS

One system. Every role. One source of truth.

InScola connects the people who run your school around the same data. A teacher enters a mark; the Vice-Principal sees it on the mastersheet; the report card prints it; the bursary's records sit alongside it. Nobody re-types anything.

- Bilingual — English & French**
 Every screen and every printed document, switched with one click.
- Out-of-20, sequences & coefficients**
 The Cameroonian grading system is built into its core — not bolted on.
- Runs on your own server**
 Inside the school building — staff connect by cable or Wi-Fi, no internet subscription needed to work.
- Ministry-style documents**
 Report cards, transcripts and ID cards in the formats schools actually use.

WHY SCHOOLS SWITCH

Three reasons to switch to InScola.

01 It does what your current system can't.

Mock results, transcripts and GCE-native grading — separation, immediately.

02 One system, where everything talks.

Marks, attendance, fees and payroll feed each other automatically.

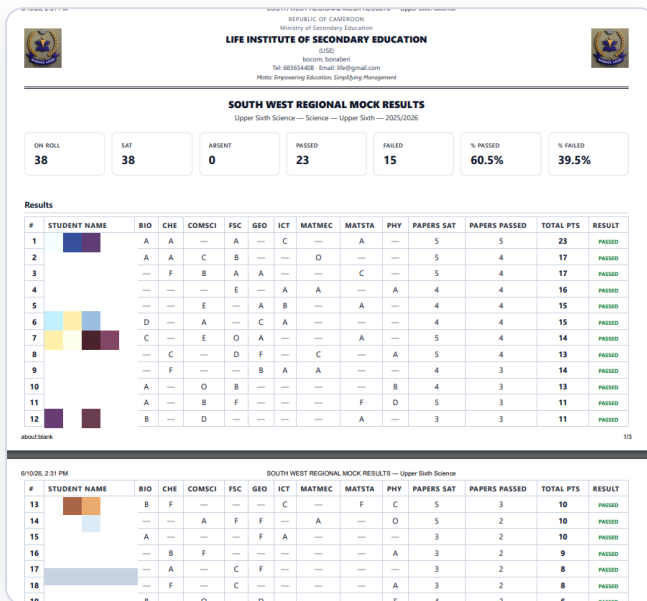

03 Owned by you. No monthly fees.

On your server, your data — removing the last objection.

01 

Does what your current system can't.

Mock results computed into GCE letter grades from marks already in the system. Transcripts pulled from years of academic history. Report cards and class council statistics generated in seconds — averages, rankings, conduct, council decisions and student photo filled in automatically. Nothing calculated by hand.

REMARK		PASSED					

THE PRINCIPAL

OFFICIAL-FORMAT TRANSCRIPT, EXAM COLUMN ON THE RIGHT

 **Mock results, GCE A–U**
Marks from any sequence become letter grades — A, B, C, D, E, O, F, U — with configurable boundaries, ranked by papers passed.

 **O-Level & A-Level transcripts**
First Cycle (Ordinary Level) and Second Cycle (Advanced Level) in the official multi-year format — editable before printing.

 **Sequences & council decisions**
Weighted annual averages and class council decisions.

WHAT IT MEANS FOR YOUR SCHOOL
Mock results, transcripts and council decisions are produced the way the examination cycle actually requires — by the system, in the official format — instead of being compiled by hand on someone's desk each term.

02

One system. Everything talks to each other.

Most schools keep marks, fees, attendance and payroll in separate places that never connect. In InScola they live together and **feed each other automatically** — nothing re-entered, nothing cross-referenced by hand.

WHAT IT MEANS FOR YOUR SCHOOL

Academics, finance, conduct *and* payroll run in one deployment on one server — so a mark entered once reaches the mastersheet, report card and transcript, and a fee paid updates the books instantly. Nothing is re-entered, nothing falls out of sync.

03 =

Owned by you. No monthly fees.

On your server, in your building, with data you can back up to a USB drive and take home. The annual licence covers support and updates — but if you ever stop, the data doesn't disappear and the system doesn't stop working.

A typical cloud system

- ✗ Charged **every month — indefinitely** (≈ 50,000–100,000 XAF/mo)
- ✗ Needs the internet to work at all
- ✗ Data sits on a server abroad

~1.8–3.6M XAF / 3 yrs — own nothing

InScola

- ✓ One modest **annual licence**, on your own hardware
- ✓ Works offline; survives power cuts on a small UPS
- ✓ You own the machine, the data and the backups

Stop paying — your data still stays with you

Deployed your way

Staff connect to the server over your school network — by cable **or Wi-Fi**, no running wires to every desk. Optionally give teachers secure online access to enter marks from home, and choose your scope: the whole school, a **school-only** (academics) or a finance-only deployment.

WHAT IT MEANS FOR YOUR SCHOOL

The system, the data and the backups sit physically in your school — for less than a year of typical cloud fees, and yours to keep whether or not you renew.

THE PEOPLE WHO RUN YOUR SCHOOL

Six roles. One system.

Each person signs in to a workspace built for their job — and only their job. The pages that follow show each in detail.

**Administrator**

Academics, students, ID cards, users — and the whole school on one dashboard.

**Teachers**

Enter marks for both sequences with autosave, imports from Excel, sees who needs help.

**Vice-Principal**

Mastersheets, coefficients, compliance, top/bottom, transcripts and report cards.

**Bursar**

The front desk of fees — structures, invoices, payments, receipts, enrollment.

**Accountant**

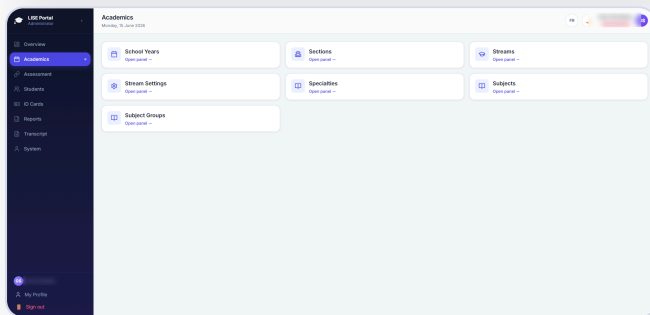

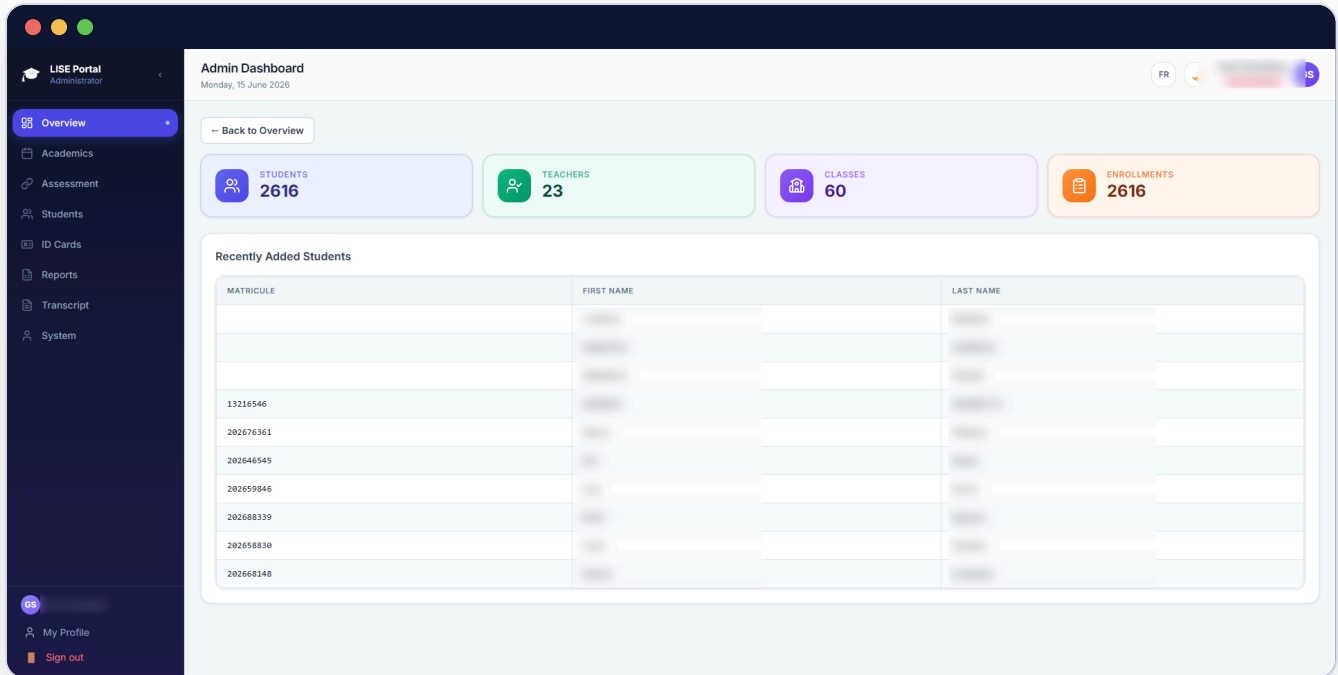

The back office — expenses, payroll, Profit & Loss, budget, statements and finance activity.

**Discipline Master**

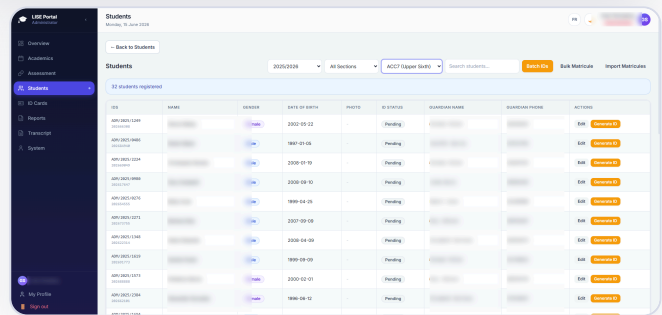

Attendance per stream, incidents with severity & sanction, automatic parent notices.

Administrator

Sets up the school and keeps it running.

ACADEMICS — YEARS, STREAMS, SUBJECTS, SPECIALTIES

STUDENTS — RECORDS, MATRICULES & ID GENERATION

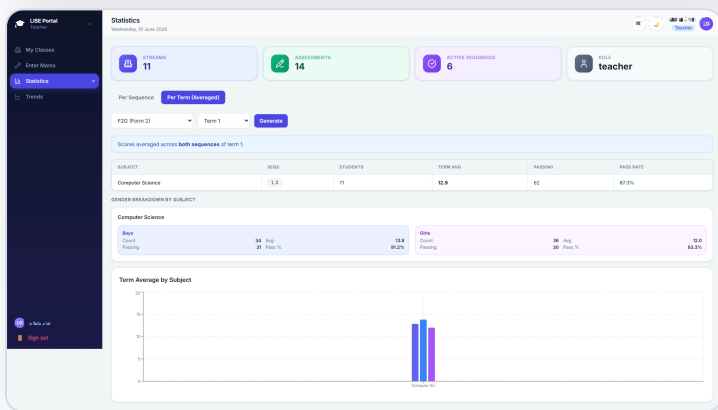

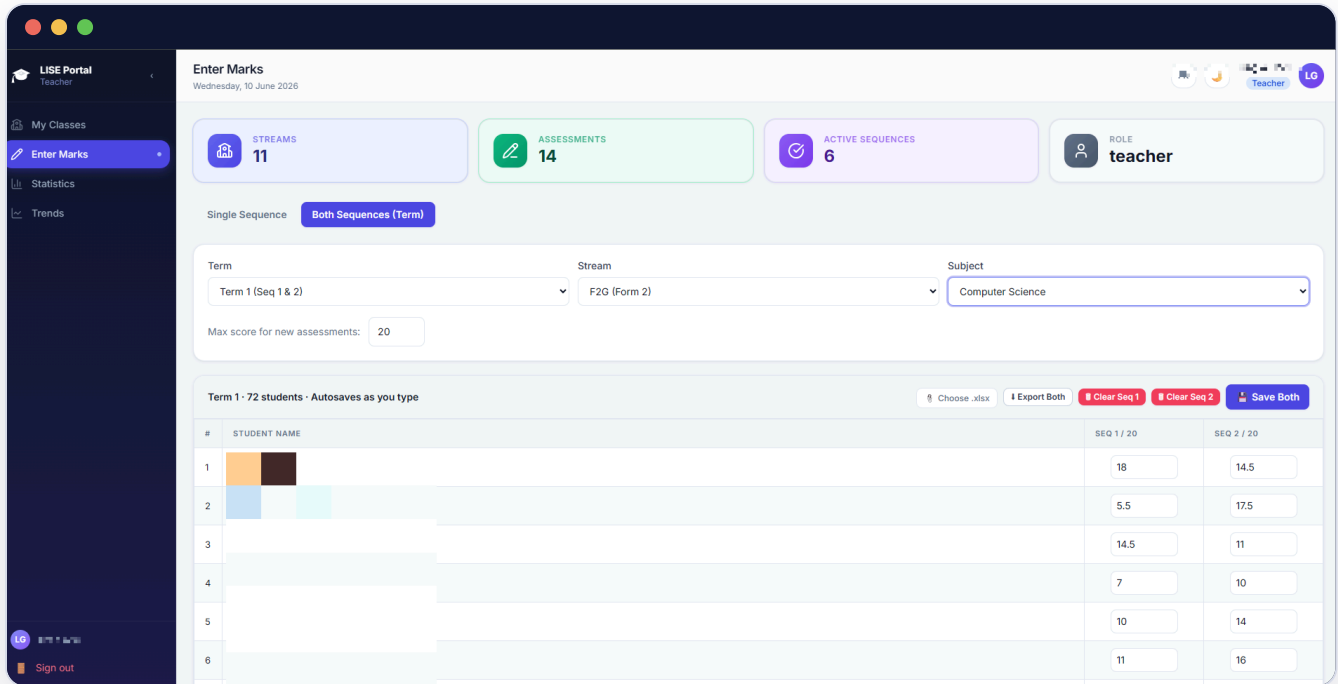

Academics
 Years, sections, streams, specialties, subjects & groups.

Students & users
 Import from Excel, manage staff accounts & roles.

Matricules & ID cards
 Import students' unique matricules and print ID cards in bulk.

Teacher

Enters marks. Sees who needs help.

PER-SUBJECT STATISTICS, PASS RATES & GENDER BREAKDOWN

- 
Marks entry, both sequences
 Type straight into the grid — it autosaves as you go.
- 
Import & export .xlsx
 Bring marks in from Excel; export a class in one click.
- 
Statistics & trends
 Averages, pass rates and term-on-term trends per subject.

Mark from anywhere — optionally
 Teachers can be given **secure online access** to enter marks remotely, while the rest of the system stays safely on your server.

Vice-Principal / Principal

Oversight without chasing paper.

TOP & BOTTOM PERFORMERS, INSTANTLY RANKED

COMPLIANCE — EXACTLY WHICH SUBMISSIONS ARE MISSING

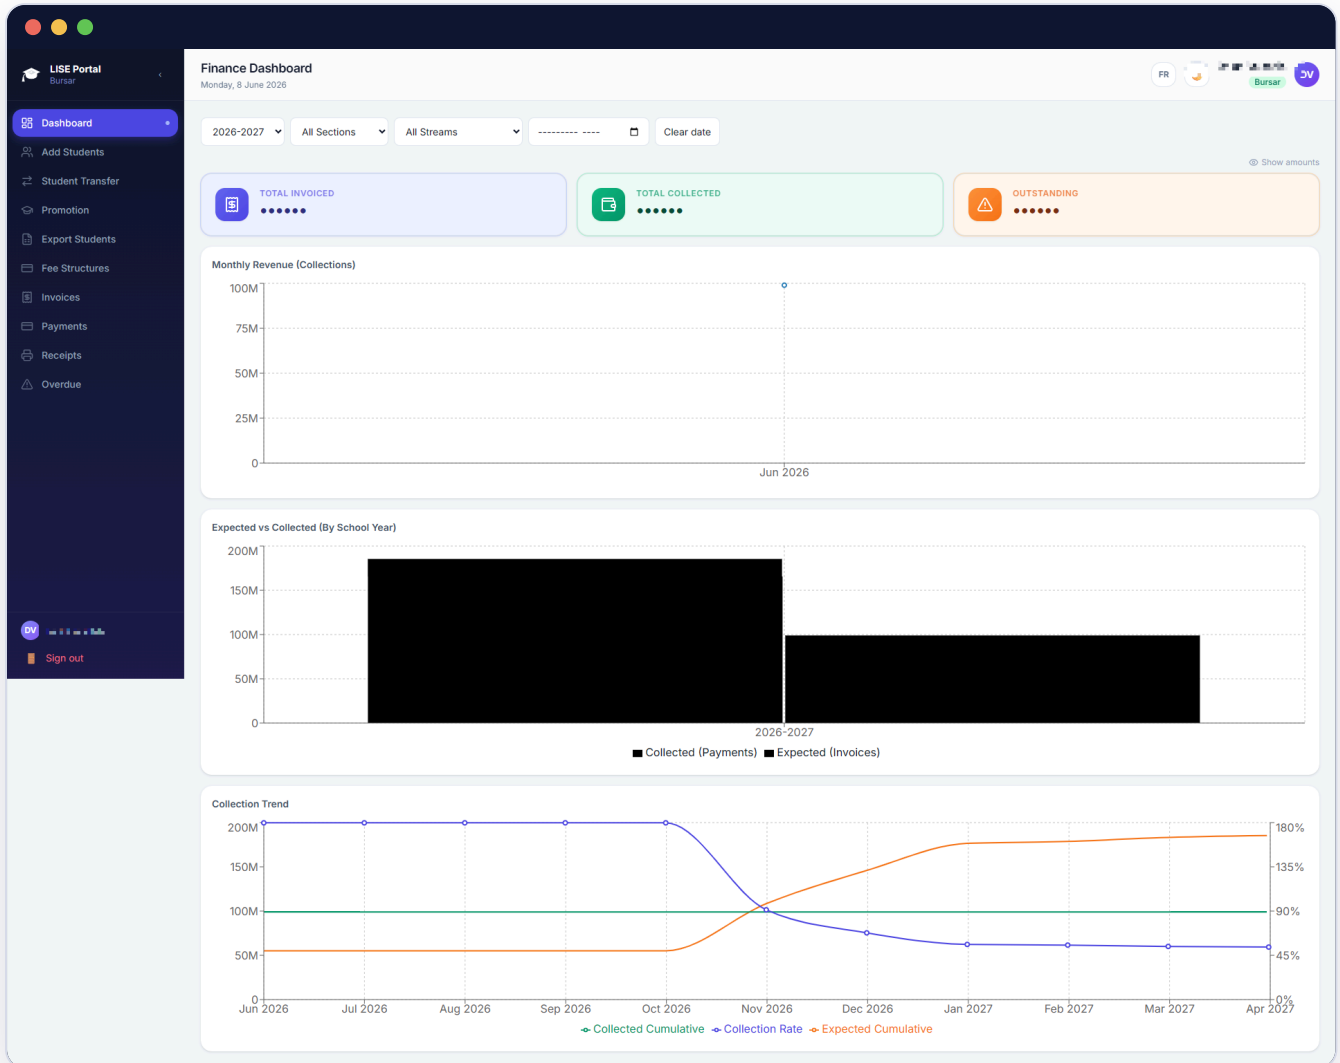

Mastersheet & marks report
Every subject, every student, one screen.

Coefficients & thresholds
Set weighting and pass rules per stream.

Report cards & transcripts
Generate and print for any class on demand.

Bursar

The front desk of fees.

INVOICES WITH INSTALMENTS, BALANCES & STATUS

- Fees, invoices & instalments**
Fee structures, invoices and instalment plans per class.
- Payments & printed receipts**
Record a payment; a branded receipt prints instantly.
- Enrollment & transfer**
Register and enroll students; handle transfers; track overdue.

Prefer to start smaller? InScola can run as a **finance-only** deployment (the bursary alone) or a **school-only** deployment (academics without finance).

Discipline Master

A clear record of conduct.

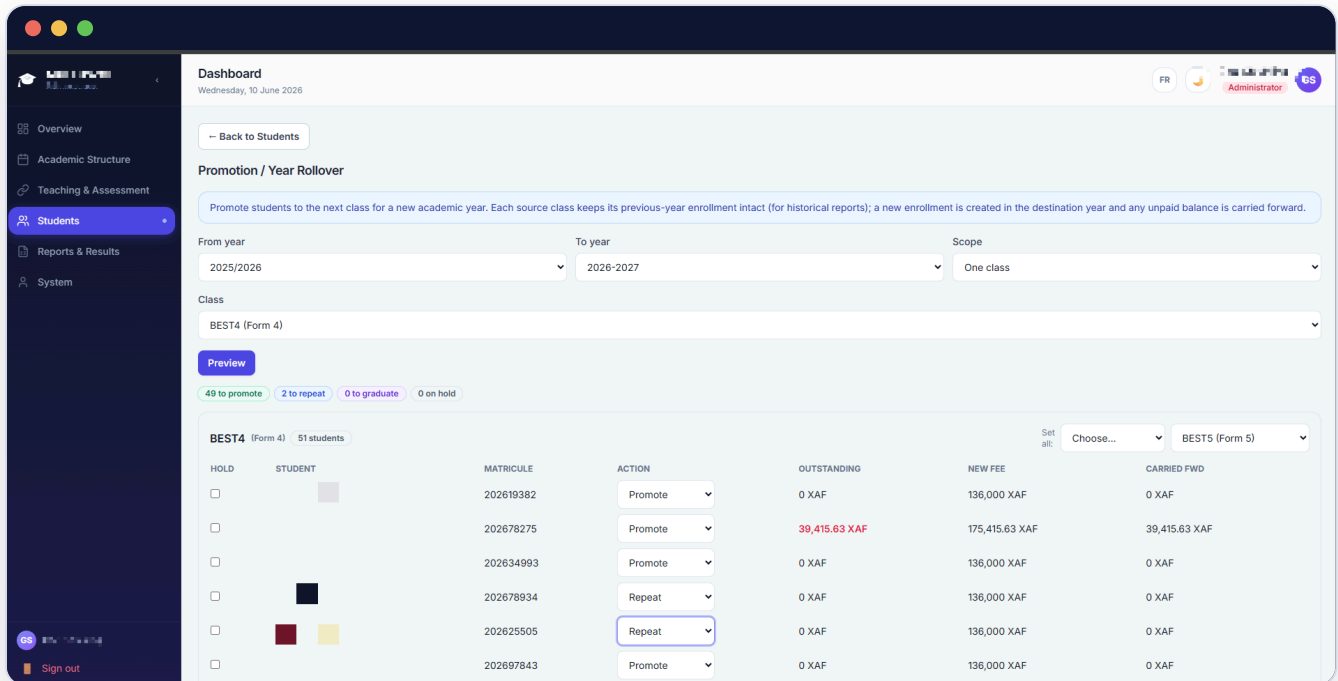

- ✓
Attendance per stream
 Mark present, absent or late in seconds, per session.
- 🛡️
Incident register
 Type, severity, sanction and notes — properly recorded.
- ➔
Feeds the report card
 Conduct on the report card comes straight from this record.

INCIDENTS LOGGED WITH SEVERITY, SANCTION & PARENT FLAG

THE NEW ACADEMIC YEAR

Into a new year in minutes — not weeks.

When the year turns, most schools rebuild everything from scratch. InScola **copies it forward** — last year becomes the starting point for this one, so you update rather than re-enter.

Structure copied forward
Sections, streams, subjects and coefficients roll into the new year, ready to tweak.

Fee structures carried over
Last year's fee plans appear in the new year — adjust the amounts and you're done.

One-click promotion
Promote a class to the next; repeat or hold individuals; graduate finalists.

Balances follow the student
Any unpaid balance is carried forward automatically — debt never gets lost between years.

AND HISTORY IS KEPT
Each previous-year enrollment stays intact, so last year's report cards and statements remain exactly as they were — for the records, and for any parent who asks.

EVERYTHING PRINTS, PROPERLY

Documents that carry your school's name.

Your header, your logo, your motto — on every page a parent or examiner will ever see. The report card follows the **official Ministry of Secondary Education format.**

MOCK RESULTS

Regional mock slips in GCE A-U grades, ready for the notice board.

CLASS LISTS

Clean printable class & enrollment lists for every stream.

ENGLISH & FRENCH

Both languages. One click.

Anglophone and Francophone sub-systems under one roof. The interface and every printed document switch language instantly — no separate install, no second product.

ENGLISH	FRENCH	CONTEXT
Sequence	<i>Séquence</i>	ASSESSMENT
Mark (out of 20)	<i>Note (sur 20)</i>	GRADING
Average	<i>Moyenne</i>	RESULTS
Report card	<i>Bulletin</i>	DOCUMENT
Term	<i>Trimestre</i>	CALENDAR
Conduct	<i>Conduite</i>	DISCIPLINE
Class council	<i>Conseil de classe</i>	DECISION
Passed	<i>Admis</i>	OUTCOME

One school may run Anglophone and Francophone streams side by side — each printing in its own language, from the same InScola.

AUTOMATIC PARENT MESSAGING

Parents hear from the school — automatically.

Payments, absences, discipline and report cards each trigger an SMS or email to the guardian on file — using message templates you control, in English or French.

Credits & top-up — full transparency

Notifications run on a transparent credit system: see exactly how many SMS & email credits you've used, and top up when you choose. No surprise bills, no hidden metering.

BUILT TO BE TRUSTED WITH STUDENT RECORDS

Who sees what — and who changed it.

Student records, fee data and staff payroll are sensitive. InScola treats them that way.

-  **Role-based access**
Each person signs in to their own workspace and sees only what their role needs — a teacher never sees payroll.
-  **Backups you control**
Regular backups to your own drive. Restoring is simple and entirely in your hands.
-  **Works offline**
No dependence on an internet link that may be slow, costly, or down.
-  **Audit trail**
Key actions are logged — who changed a mark, recorded a payment, or edited a record, and when.
-  **On-premise, no data sharing**
Nothing is sent to a third party. Your data never leaves the building unless you choose.
-  **Verifiable documents**
Report cards carry a QR code, so a printed copy can be checked against the record.

IN ONE LINE

Your school owns the system, the data, and the backups — and can see exactly who did what.

THE FULL PICTURE

Everything InScola does.

📚 Academic

- School years, sections, streams & specialties
- Subjects, subject groups & coefficients
- Marks entry by sequence & term, autosave
- Excel import / export of marks
- Mastersheets, marks reports & thresholds
- Top / bottom performers & statistics
- One-click promotion & year rollover

💰 Finance

- Fee structures & instalment plans
- Invoices, payments & receipts
- Overdue tracking & collection trends
- Expenses, Profit & Loss & budget variance
- Payroll, payslips & statements
- Finance-only or school-only deployment

📄 Documents

- Report cards with QR verification
- O-Level & A-Level transcripts
- GCE-style mock results (A–U)
- Student ID cards & class lists
- Payment receipts & invoices
- Staff payslips

🛡️ Conduct, comms & system

- Attendance & incident register
- SMS & email notifications + templates
- Transparent notification credits & top-up
- Role-based accounts & audit trail
- Wired or Wi-Fi access; optional online marks entry
- Bilingual EN / FR throughout

6 ROLES **2** LANGUAGES **1** SERVER, IN YOUR SCHOOL

HONEST COMPARISON

Why schools switch to InScola.

	BY HAND / EXCEL	GENERIC SOFTWARE	INSCOLA
All-in-one	Separate tools	Academics or finance	Marks, fees, conduct & payroll
Everything connected	Re-typed by hand	Siloed modules	Feeds each other automatically
Mock results / GCE	Hand-compiled	Not supported	A-U, built in
Transcripts	Typed per cell	Wrong format	O-Level & A-Level, official
Grading system	Manual averages	"GPA", equal subjects	/20, sequences, coefficients
Language	Whatever you type	English only	English & French
New-year setup	Rebuilt each year	Manual re-entry	Copied forward, then tweak
Where data lives	One fragile laptop	A server abroad	Your own server
Cost model	Hidden labour cost	Monthly, forever	One annual licence — yours
If you stop paying	—	Data locked / gone	Data stays with you

A principal who has seen the things their current system can't do, watched the parts talk to each other, and heard that the data stays in the building they own — is no longer comparing vendors. They're asking **when you can install it.**

GETTING STARTED

Live in a few days.

Most schools are running on InScola within a week — often before the next sequence.

1

Install on your server

We set InScola up on a machine in your school and configure the network.

2

Import your students

Bring your student list in from Excel; matricules and ID cards generate in bulk.

3

Set up structure & fees

Streams, subjects, coefficients, fee structures and thresholds — to match your school.

4

Train your staff

A single day is usually enough — the workspaces are built around each role.

5

Go live

Teachers enter marks, the bursary records fees, and report cards print on demand.

WHAT WE'LL NEED FROM YOU

A computer to serve as the server

Plus a small UPS for power cuts.

Your student & staff lists

In any spreadsheet — we handle the rest.

Your academic & fee structure

Streams, coefficients and what each class pays.

Your logo & school header

So every document carries your brand.

SUPPORT

Setup, training and ongoing support are included. You're never left alone with the software.

SEE IT FOR YOURSELF

Book a live demo — at your school.

Nothing explains InScola like watching it do what your current system can't — with your own school's example in hand. We'll come to you.
